

Executive Summary

Corporate FP&A Budgeting & Forecasting Model

Cascade Outdoor Manufacturing | Historical Actuals: 2023–2025 | Forecast: 2026–2028

Executive Overview

The Corporate FP&A Budgeting & Forecasting Model translates three years of historical financial performance into a three-year forward-looking planning model. It integrates revenue growth, gross margin, operating expense, headcount, capital expenditures, and cash flow assumptions to support forecasting, scenario analysis, management reporting, and financial decision-making.

2028 Base Case Outlook

Revenue	Operating Income	Operating Margin	Free Cash Flow	Ending Cash
\$6.11M	\$1.38M	22.5%	\$1.25M	\$4.86M

Financial Outlook

Base Case revenue increases from approximately \$4.86M in 2025 to \$6.11M in 2028. Operating income increases from approximately \$1.02M to \$1.38M, while operating margin expands from about 20.9% to 22.5%. Free cash flow remains positive throughout the forecast period, reaching approximately \$1.25M in 2028.

Scenario Analysis

2028 Scenario	Revenue	Operating Income	Free Cash Flow
Best Case	\$6.63M	\$2.82M	\$2.70M
Base Case	\$6.11M	\$2.53M	\$2.41M
Worst Case	\$5.61M	\$2.27M	\$2.15M

The scenario range highlights sensitivity to revenue growth, gross margin, and operating expense growth. The 2028 Best-to-Worst range is approximately \$1.02M for revenue and \$0.55M for free cash flow.

Operational Planning

Headcount increases from 92 employees in 2025 to a projected 107 in 2028. Capital expenditures increase from approximately \$410,000 in 2025 to approximately \$475,000 in 2028. These schedules connect operational planning with the financial forecast.

Management Priorities

- **Protect revenue growth:** Monitor actual performance against the 7.9% Base Case growth assumption.
- **Maintain margin discipline:** Gross margin is a major profitability driver.
- **Control operating expense growth:** Keep expense growth aligned with revenue and operating capacity.
- **Monitor cash generation:** Positive free cash flow provides increasing financial flexibility.
- **Use scenarios as planning boundaries:** Evaluate upside opportunities and downside risks.

Model Quality & Readiness

The completed workbook includes reconciliation checks, forecast validation, scenario validation, management reporting status, and a master model QA status. Final review resulted in a **PASS** QA status and the workbook is designated **READY FOR MANAGEMENT PRESENTATION**.

Tools

Microsoft Excel for Web was used to build the integrated financial model, supporting schedules, scenario analysis, management reporting, and quality controls. The model uses standard spreadsheet formulas and does not rely on macros, VBA, Power Query, or paid software.

Portfolio Note: Cascade Outdoor Manufacturing is a fictional company and the financial data is illustrative. This project demonstrates practical FP&A modeling, forecasting, scenario analysis, financial reporting, and management decision-support capabilities.
